Projects

SmartHire – Resume Skill Matching Website | ***Python, Flask, SQLite, HTML, CSS*** Live Demo

- Developed a web application using Python and Flask to analyze resumes against job descriptions.
- Implemented resume parsing and job description extraction to identify matching and missing skills and calculate a match score.
- Used SQLite to store analysis history and provided resume improvement suggestions based on job requirements.

QuickCart – E-Commerce Website | ***HTML, CSS, JavaScript, Local Storage*** Live Demo

- Developed a responsive e-commerce website interface to display products using HTML and CSS.
- Implemented JavaScript functionality for product cards and Add to Cart interactions.
- Used Local Storage to save and retrieve cart data and created navigation between home, login, and cart pages.

NOVA – AI Voice Assistant | ***Python, Flask, AI API, Speech Recognition, SQLite*** Live Demo

- Developed a voice-based AI assistant that accepts spoken queries and displays responses as text while reading them aloud.
- Integrated an AI language model to generate concise, context-aware answers to user questions.
- Implemented SQLite to store conversation history, allowing users to revisit previous queries and responses.

Certifications

- Python Certificate – Cisco
- Java Certificate – GeeksforGeeks
- MongoDB Certificate – GeeksforGeeks
